

Drum Dispensing Skids

PRODUCT DESCRIPTION

Air operated Drum Dispensing Skids designed to move drums around the workshop or on the back of a service vehicle for in-field use. Suitable for 1, 2, 3 or 4 x 205 litre drums. Fully integrated powder coated aluminium panel with supports for dispensing gun and pump, and a 3 metre flexible dispensing hose. Adaptable to different tank types and can be quickly disassembled. Quick connect camlock suction system minimises the chance of spills.

KEY FEATURES & BENEFITS

- Onboard quality filtration
- Recirculation & dispensing of filtered oils
- Surge suppression on pneumatic pumps
- Air or electric options
- Trigger operated dispensing guns
- Fast dismount and remount of drums
- Suitable for oil viscosity up to 460 cSt

TECHNICAL SPECIFICATIONS

Parameter	Value	Unit	Test Method
Inclusions — Pneumatic: Pump	5:1 ratio pump		
Inclusions — Pneumatic: Filter	Quality filter, 5 or 12 micron		
Inclusions — Pneumatic: Frame	Rugged frame with drip tray & fork tines		
Inclusions — Pneumatic: Other	Air regulator, all connecting fittings, hoses & desiccant breather, hose reel & dispensing gun, breather/suction spear, spear retainer/holder		
Inclusions — Electric: Pump	Low or high viscosity pumps		
Inclusions — Electric: Power	10 metre electrical cord, lockable ON/OFF switch
