INDUSTRIAL CHAIN LUBRICANTS

VISCOGEN KL 23 SPRAY

SYNTHETIC HIGH TEMPERATURE CHAIN LUBRICANT

Castrol Viscogen KL 23 Spray is designed for high temperature lubrication in severe environments, where the use of mineral oils or conventional synthetic oils would result in excessive wear, carbonisation and residue formation. It has been developed from base fluids which form exceptionally adherent, transparent and odourless lubricating films and an additive system free of solids, metals or silicone which enhances load carrying capability and wear protection.

Castrol Viscogen KL 23 Spray is especially suitable for use in BOPP (Biaxially oriented Polypropylene) film stretching machines. Other applications include high-rack storage shelves, bakery machines, paint lines, conveyor chains, tenter frames and dryers, washing plants, underfloor chains, steamers, slashers, baking ovens, slide ways, spindles, ropes, open gear wheels, plastic toothed belts and sheet-fed offset machines.

FEATURES & BENEFITS

- Particularly suited to lubricate difficult to reach lubrication points
- Easy and economical use with adjustable spray head. Spraying foam remains until oil has penetrated into the friction point.

Pack size	12x400ML
Item Code	3408391
Barcode	9310084026331
