

Hand Held Drum Dispensing Unit

Product Code: LL-HFU-009

PRODUCT DESCRIPTION

This light weight filter unit has been specifically designed for ease of use when dispensing bulk oils from drums. Able to be easily installed the dispensing unit is an effective and user friendly device for the application of transferring oils into smaller dispensing containers. Used in conjunction with a mobile container storage trolley the execution of fluid transfer becomes a safe and effective undertaking. Quick connect fittings are used to transfer fluids ensuring that the container lid or pump assembly does not need to be removed which is vital to ensure total contaminant exclusion when dispensing in an open space or area.

KEY FEATURES & BENEFITS

- Kidney loop filtering of oil drums prior to dispensing
- Quality Pall filtration ensuring that oils meet the required ISO4406 Cleanliness Code
- Drum breather spike assembly providing dual functions of breather mounting and suction spike with adjustable length
- Quick connect dispensing into containers to eliminate environmental contaminants

TECHNICAL SPECIFICATIONS

Parameter	Value	Unit
Viscosity (max)	ISO460oil	
Filter	Quality Pall 5, 7 or 12 micron $\beta=2000$	
Filter indicator	Visual blockage indicator	
Flow rate	9	litres/min
Electrical connection	Single phase, 10amp	
Pump bypass/relief	Set to 5	bar
Frame	Aluminium checker with rubber feet	
Connections	Camlock with caps & chains	
Drum/breather spear	Dedicated with desiccant breather	
Hoses	Delivery & suction with female camlocks & plugs	
Dimensions	450H x 500W x 300D	mm
Weight (max)	20	kg
Option – Trolley	Trolley for dispensing containers	
Option – Containers	Colour coded dispensing containers
