Lube Control Pty Ltd

Perma 4 Point Heavy Duty Cage Hanger Installation Kit

Heavy duty installation kits have been specifically designed for use in operational areas which are subject to regular wash down and water impact, such as the conditions found in coal handling preparation plants. The installation kits are highly versatile and can be adapted for attachment to beam sections and square mesh safety cages. The bracket systems included in heavy duty installation kits are fabricated in Australia from stainless steel.

Heavy duty installation kits include lubricator covers and manual purge kits for each lubrication point along with a range of commonly required fittings, push-lock swivel hose ends and high quality Duffield brand hose with 3/8" internal diameter.

Product

SKU	K4CHC
Range	Heavy Duty Kits - 60, 120 and 250cc
